

EDUCATION

Maharaja Agrasen Institute Of Technology (MAIT) Bachelor of Technology; CGPA: 8.32	New Delhi, India November 2021 – July 2024
--	--

PROFESSIONAL SUMMARY

Software Engineer with **2 years of experience** building end-to-end features using **React, Next.js, TypeScript, Node.js, and PostgreSQL**. Proven track record in designing high-performance **RESTful APIs**, CI/CD pipelines, banking integrations (Bajaj, SBI FASTag), and event-driven payment workflows. Skilled in **system design (HLD/LLD)**, database optimization, authentication (**JWT, RBAC**), and cloud infrastructure with **Docker** and **AWS ECS**. Delivered production-grade platforms serving **2000+ users** with **99.9% uptime**, writing clean, maintainable code across the full stack.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Java, C++
- **Frontend:** React.js, Next.js, Redux, HTML5, CSS3, React Native
- **Backend:** Node.js, Express.js, REST APIs, Socket.io, Webhooks, Microservices
- **Cloud & DevOps:** AWS (ECS, ECR, Lambda, S3, RDS), Docker, CI/CD, Nginx, Git, GitHub
- **Databases:** MongoDB, PostgreSQL, MySQL
- **Testing & Tools:** Jest, Swagger, Postman, JWT, RBAC, VAPT
- **Concepts:** System Design, HLD/LLD, Event-Driven Architecture, Agile

EXPERIENCE

Chairbord Pvt. Ltd. Full Stack Engineer ◦ Platform Architecture: Engineered a production-grade FASTag platform (0 to 1) using Node.js, PostgreSQL, and React Native, scaling to 2000+ active users across a microservices-based architecture. ◦ Frontend Development: Built and shipped a Next.js admin panel and FASTag management UI with responsive, user-focused components and real-time data updates via Socket.IO. ◦ System Design: Architected HLD and LLD covering service structure, database schemas, API contracts, and CI/CD deployment workflows on AWS ECS. ◦ REST API Engineering: Developed 30+ RESTful APIs handling 5K+ daily requests with JWT authentication, input validation, and optimized PostgreSQL queries achieving sub-250ms response time. ◦ Multi-Bank Integrations: Integrated SBI, Bajaj, and Airtel APIs, handling onboarding flows, KYC verification, and end-to-end transaction lifecycles. ◦ Payment Processing: Integrated Cashfree and SabPaisa payment gateways, processing Rs.5L+ monthly transactions with webhook-based event-driven reconciliation and automated failure handling. ◦ Cloud Infrastructure: Provisioned and managed AWS infrastructure (ECS, ECR, S3, RDS) with Docker containers and Nginx reverse proxy, maintaining 99.9% uptime. ◦ Testing & Security: Wrote unit tests using Jest for API endpoints and business logic; conducted VAPT testing and enforced RBAC policies for sensitive financial data.	Jaipur, India (Remote) Apr 2024 – Present
Cadillacs Full Stack Engineer ◦ Frontend & Web Platform: Built and deployed responsive web applications using Next.js and React.js serving 2000+ users, reducing page load time by 35% through performance optimization and code-splitting. ◦ Backend API Development: Delivered RESTful backend services with Node.js for a blockchain-based carbon offset platform processing 1000+ transactions, improving supply chain data transparency. ◦ Infrastructure and CI/CD: Configured AWS EC2 deployments with Docker containers and Nginx reverse proxy; established CI/CD pipelines for automated build and deployment workflows. ◦ Blockchain Solutions: Optimized smart contracts for carbon offset transactions, reducing processing time by 40% and cutting gas costs by 25%.	Delhi NCR, India May 2023 – Apr 2024

PROJECTS

Chairbord FASTag Platform Full Stack Engineer ◦ Real-Time Event System: Architected event-driven systems enabling sub-second updates between dashboards and 2000+ mobile users using Socket.IO. ◦ Admin Platform: Designed and launched production web systems including Next.js admin panel, RC download portal, and FASTag management platform with reusable UI components. ◦ Payment Integration: Integrated Cashfree gateway webhook handlers for reliable transaction confirmation and wallet reconciliation.	India 2024
Spyne Backend Backend Developer ◦ Authentication & API Design: Developed secure JWT-based auth, role-based access control, and RESTful APIs securing 1000+ API interactions/day; wrote unit tests using Jest for core modules. ◦ Deployment & System Design: Deployed containerized services; documented system design with LLD, database schema, and API workflows.	India 2024
